

# ANTI-CHOICE PROJECT

making abortion impossible to ignore or trivialize

Feb 2015, Quarterly Newsletter | [antichoiceproject.com](http://antichoiceproject.com) | PO Box 5992, Bremerton, WA 98312 | [info@antichoiceproject.com](mailto:info@antichoiceproject.com)

Dear Friend of the Anti-Choice Project,

Thanks to your prayers and support, in 2014 the Anti-Choice Project was able to expand to even more cities, exposing the truth about abortion on more streets and on more school campuses all across the country. Since our founding in 2009, the Anti-Choice Project has changed countless minds and saved countable babies. This was recently confirmed by new data from the Washington State Department of Health which revealed that between 2009 and 2013 the number of abortions performed in Kitsap County saw a stunning 26% drop!

## LASTING AND MEASURABLE RESULTS

Certainly pro-life legal victories at the national level, and the efforts of local campaigns like 40 Days for Life have played crucial roles in this tremendous achievement, but who can deny that showing Kitsap residents the horror and inhumanity of abortion two hours a week for six years has not precipitated such a dramatic decline, saving literally hundreds of babies each year from an abortionist's instruments of death?

As Gregg Cunningham, executive director of the Center for Bio-Ethical Reform explains, "For most mothers and fathers, denial is the great facilitator in every decision to kill a baby." The corollary is equally true: Confronting mothers and fathers with shocking photos of abortion victims ends their denial, and ultimately ends their trip to Planned Parenthood as these Department of Health statistics bear out.

## MARCH FOR LIFE, OLYMPIA, WASHINGTON

In keeping with our annual tradition, ACP was present again this year at the March for Life in Olympia, Washington, on January 20<sup>th</sup>. An estimated 5,000-7,000 pro-lifers gathered on the steps of Washington State's legislative building to exercise their first amendment rights and give voice to the smallest and weakest members of our society. We stood in protest of the dreadful Supreme Court decisions of 1973 which found in our Constitution a mother's right to kill her preborn children for any reason through all nine months of pregnancy. In Olympia, the Anti-Choice Project displayed our two 5'x10' banners, oriented toward the crowd, affirming the need and challenging others to expose the injustice of abortion.

## ACP CONTINUES TO GROW

In 2014 the Anti-Choice Project added new chapters in Spokane, Washington, Houston, Texas, and Bellingham, Washington. And we are excited to announce that just last month we shipped a brand new set of signs to our newest chapter in Washington, D.C., which is headed up by Lauren Handy! Lauren received the signs in time to bring them to the national March for Life where she was joined by approximately 500,000 fellow pro-life marchers.

*"Difficult change is usually unattainable unless the pain of the status quo can be made more intense than the pain of reform. The pro-life movement has been unwilling to inflict pain on the public because doing so invites persecution. Our comfort and safety is being purchased at a truly horrifying price."*

– Gregg Cunningham, Center for Bio-Ethical Reform

In May of last year Lauren visited us and participated in an ACP display in Silverdale, Washington, while she was on a cross-country pro-life tour with our good friends at the Survivors of the Abortion Holocaust. We are very excited to have Lauren on our team as her zeal and passion for saving babies is truly remarkable and inspiring.

To our detractors and critics who demand we take the pictures down we reply: We are here because abortion is here. If you want the pictures to stop, then stop the killing.
